RL32760

Summary

The Temporary Assistance for Needy Families (TANF) block grant funds a wide range of benefits and services for low-income families with children. TANF was created in the 1996 welfare reform law (P.L. 104-193). This report responds to some frequently asked questions about TANF; it does not describe TANF rules (see, instead, CRS In Focus IF10036, *The Temporary Assistance for Needy Families (TANF) Block Grant*, by Gene Falk).

TANF Funding. TANF provides fixed funding to states, the bulk of which is provided in a \$16.5 billion-per-year basic federal block grant. States are also required in total to contribute, from their own funds, at least \$10.4 billion under a maintenance-of-effort (MOE) requirement.

Federal and State TANF Expenditures. Though TANF is best known for funding cash assistance payments for needy families with children, the block grant and MOE funds are used for a wide variety of benefits and activities. In FY2014, expenditures on basic assistance (cash assistance) totaled \$8.4 billion—26% of total federal TANF and MOE dollars. TANF also contributes funds for child care and services for children who have been, or are at risk of being, abused and neglected. Some states also count expenditures in the pre-Kindergarten programs toward the MOE requirement.

Cash Assistance Caseload. A total of 1.6 million families, composed of 4.1 million recipients, received TANF- or MOE-funded cash in March 2015. The bulk of the “recipients” were children—2.9 million in that month. The cash assistance caseload is heterogeneous. The type of family historically thought of as the “typical” cash assistance family—one with an unemployed adult recipient—accounted for less than half (45%) of all families on the rolls in FY2013. Additionally, 17% of cash assistance families had an employed adult, while 38% of all TANF families were “child-only” and had no adult recipient. Child-only families include those with disabled adults receiving Supplemental Security Income (SSI), adults who are nonparents (e.g., grandparents, aunts, uncles) caring for children, and families consisting of citizen children and ineligible noncitizen parents.

Cash Assistance Benefits. TANF cash benefits are set by states. In July 2013, the maximum monthly benefit for a family of three ranged from \$923 in Alaska to \$170 in Mississippi. Benefits in all states represent a fraction of poverty-level income. In the median jurisdiction (the District of Columbia), the maximum monthly benefit of \$428 for a family of three represents 26% of poverty-level income.

Cash Assistance Work Requirements. TANF requires states to engage 50% of all families and 90% of two-parent families in work activities. However, these standards are reduced by the amount of a state’s caseload reduction from FY2005. Further, states may get an extra credit against these standards by spending more than required under the TANF MOE. Therefore, the effective standards states face are often less than the 50% or 90% targets, and vary by state. In FY2012 states achieved an all-family participation rate of 34.4% and a two-parent rate of 33.9%. That year, 16 jurisdictions failed the all-family standard, and 20 jurisdictions failed the two-parent standard. States that fail to meet work standards are *at risk* of being penalized by a reduction in their block grant.

Introduction

This report provides responses to frequently asked questions about the Temporary Assistance for Needy Families (TANF) block grant. It is intended to serve as a quick reference to provide easy access to information and data. This report does not provide information on TANF program rules. For a non-technical overview of TANF, see CRS In Focus IF10036, *The Temporary Assistance for Needy Families (TANF) Block Grant*, by Gene Falk.

Current Topics

What Is TANF’s Current Funding Status?

P.L. 114-113 (The Consolidated Appropriations Act, 2016) extends TANF funding through September 30, 2016.¹ Funding for TANF is provided at the same level, and on the same terms, as in FY2015.

What Is TANF’s Funding Level?

Table 1 shows TANF funding for FY2008 through FY2016. The bulk of TANF funding is in a basic block grant (the state family assistance grant), which provides annual funding totaling \$16.5 billion for the 50 states and District of Columbia. This grant amount was established in the 1996 welfare reform law and has not been changed since then.

FY2016 funding for TANF grants is the same as in FY2015. As was the case in the prior year, a total of \$583 million is available for FY2016 contingency fund grants to states, compared with \$610 million in FY2014.

Table 1. Federal Funding for TANF Grants: FY2008 Through FY2015
(Dollars in millions)

	2008	2009	2010	2011	2012	2013	2014	2015	2016
State family assistance grant	\$16,489	\$16,489	\$16,489	\$16,489	\$16,489	\$16,489	\$16,489	\$16,489	\$16,489
Supplemental grants	319	319	319	211	0	0	0	0	0
Healthy marriage/responsible fatherhood grants	150	150	150	150	150	150	150	150	150
Grants to the territories	78	78	78	78	78	78	78	78	78
Grants for tribal work programs	8	8	8	8	8	8	8	8	8
Contingency fund	428	1,107	212	334	612	610 ^a	610 ^a	583 ^b	583 ^c
Emergency contingency fund		617	4,383						
Totals	17,472	18,768	21,639	17,270	17,337	17,335	17,335	17,308	17,308

¹ The extension of program authority and funding for TANF is contained in Section 230 of Division H of the public law.

Source: Congressional Research Service (CRS), based on data from HHS.

- a. P.L. 112-275 appropriated \$612 million to the TANF contingency fund for FY2013 and FY2014, and reserved \$2 million in each year of these funds for a commission on child abuse and neglect fatalities. Thus, \$610 million was available for FY2013 and FY2014 TANF contingency fund grants to states.
- b. P.L. 113-235 appropriated \$608 million to the TANF contingency fund for FY2015 and FY2016, but sets aside from those funds \$15 million for HHS welfare research activities and \$10 million for U.S. Census Bureau activities related to welfare research.
- c. P.L. 114-113 appropriated \$160 million to the TANF contingency fund for FY2016 and FY2017. It set aside from those funds \$15 million for HHS welfare research activities and \$10 million for U.S. Census Bureau activities related to welfare research. (The FY2016 appropriation to the contingency fund made by P.L. 114-113 replaced the FY2016 appropriation previously made by P.L. 113-235.)

In addition to federal TANF funds, states are required in total to contribute, from their own funds, at least \$10.4 billion per year for TANF-related activities for low-income families with children. This level of state funding, known as *maintenance-of-effort* (MOE) funding, was also established in the 1996 welfare law and has not been changed since then.

May States Require Drug Testing of TANF Cash Assistance Recipients?

Yes. The 1996 welfare reform law gave states the *option* of requiring drug tests for assistance recipients and penalizing those who fail such tests. (See Section 902 of P.L. 104-193.) However, specific state policies regarding drug testing raise constitutional issues. For a discussion of states that require drug testing in TANF and related programs, see CRS Report R42394, *Drug Testing and Crime-Related Restrictions in TANF, SNAP, and Housing Assistance*, by Maggie McCarty et al. See also CRS Report R42326, *Constitutional Analysis of Suspicionless Drug Testing Requirements for the Receipt of Governmental Benefits*, by David H. Carpenter.

What Are TANF's Rules for Drug Felons?

The 1996 welfare reform law established a lifetime ban on eligibility for TANF and food stamps for those convicted of a drug-related felony. However, states may either opt out entirely or modify and limit this lifetime ban. (See Section 115 of P.L. 104-193.)²

What Are TANF's Rules for Substance Abuse Treatment?

States may use TANF funds for substance abuse treatment. Federal TANF dollars cannot be used for “medical services,” but can be used for “non-medical” treatment such as counseling. State MOE dollars can be used for medical services connected with substance abuse treatment.

TANF requires states to conduct an employability assessment of adult recipients, and allows states to establish Individual Responsibility Plans (IRPs) for their TANF families. The IRP may require participation in a substance abuse treatment program. A family may be sanctioned for failure to comply with its IRP.

Additionally, a state may engage recipients in substance abuse treatment and count that activity toward its work participation standard, though such an activity is counted only for a limited

² TANF also bars aid to fleeing felons and people convicted of welfare fraud by misrepresenting their state of residence. For an overview of rules for TANF, as well as those for the Supplemental Nutrition Assistance Program (SNAP) and housing assistance programs related to drug testing and crime-related issues, see CRS Report R42394, *Drug Testing and Crime-Related Restrictions in TANF, SNAP, and Housing Assistance*, by Maggie McCarty et al.

period of time. Substance abuse treatment is considered a “job readiness” activity; a state may count job search and job readiness activities for a maximum of 12 weeks in a year toward its work participation standards.

What Is the Administration’s “Waiver” Initiative?

On July 12, 2012, the Department of Health and Human Services (HHS) announced that it would accept applications for “waivers” of the TANF work participation standards. In general, these are waivers of the way the performance of state welfare-to-work programs are assessed, the federal work participation standards. Under the initiative, states would have to apply for a waiver and have that waiver approved by HHS and the Office of Management and Budget (OMB). For a discussion, see CRS Report R42627, *Temporary Assistance for Needy Families (TANF): Welfare Waivers*, by Gene Falk.

Has Any State Formally Applied for a “Waiver” of TANF Work Participation Standards?

As of October 30, 2015, one state (Ohio) had requested a waiver of TANF work participation standards. The request was under consideration by the Administration.

Are there Restrictions on a Family’s Use of TANF Benefits?

TANF funds a wide range of benefits and services, many of which are for specific purposes. However, TANF is best known for helping states finance their cash public assistance programs for needy families with children. The “cash” benefits are often paid on an Electronic Benefit Transaction (EBT) card that a recipient can take to an Automated Teller Machine (ATM) to draw cash or use to purchase goods and services at a point-of-sale device. As “cash,” there are no restrictions on the types of goods and services that can be purchased with a TANF benefit.

However, TANF law does restrict *where* a recipient might access benefits at an ATM. P.L. 112-96 prevents electronic benefit transaction access to TANF cash at liquor stores, casinos, and strip clubs. States are required to prohibit access to TANF cash at Automated Teller Machines (ATMs) at such establishments.

Funding and Expenditures

How Much Has the TANF Grant Declined in Value Because of Inflation?

From FY1997 (the first full year of TANF funding) through FY2015 (ended September 30, 2015), the real value of the TANF block grant declined by 32.5%. **Table 2** shows the impact of inflation on the value of the TANF block grant for each year, FY1997 through FY2015. On average, the TANF basic block grant has lost 2.2% of its value each year over that period.

Table 2. TANF Basic Block Grant Funding in Constant Dollars

Fiscal Year	Value of the Basic TANF Block Grant in FY1997 Dollars (\$ in billions)	Cumulative Change in Value of the Basic Block Grant from FY1997 Levels
1997	\$16.5	
1998	16.2	-1.6%
1999	15.9	-3.5
2000	15.4	-6.4
2001	14.9	-9.4
2002	14.7	-10.7
2003	14.4	-12.7
2004	14.1	-14.7
2005	13.6	-17.4
2006	13.1	-20.4
2007	12.8	-22.2
2008	12.3	-25.5
2009	12.3	-25.3
2010	12.1	-26.5
2011	11.8	-28.4
2012	11.5	-30.1
2013	11.3	-31.2
2014	11.2	-32.3
2015	11.1	-32.5
Average Annual Rate of Change in the Value of the Block Grant		-2.2%

Notes: Constant dollars were computed using the Consumer Price Index for all Urban Consumers (CPI-U).

How May States Use Federal TANF Funds?

TANF is a broad-purpose block grant that gives states the flexibility to use its funds to address both the effects of, and the root causes of, childhood economic disadvantage. There are two sets of rules: those that relate to the use of federal TANF grants, and those for which state expenditures count toward meeting the TANF MOE state spending requirement.

States have broad discretion on how they expend federal TANF grants. States may use TANF funds “in any manner that is reasonably calculated” to accomplish the block grant’s statutory purpose. That purpose is to increase the flexibility of states in operating a program designed to

1. provide assistance to needy families so that children may be cared for in their own homes or in the homes of relatives;

2. end the dependence of needy parents on government benefits by promoting job preparation, work, and marriage;
3. prevent and reduce the incidence of out-of-wedlock pregnancies and establish annual numerical goals for preventing and reducing the incidence of these pregnancies; and
4. encourage the formation and maintenance of two-parent families.

In addition, states may also expend federal TANF grants on any activity financed by pre-TANF programs. These are known as “grandfathered” activities. Examples of activities that do not meet a TANF goal but may be financed by TANF grants include foster care payments and funding for juvenile justice activities, if they were financed in the pre-TANF programs.

In addition to expending federal funds on allowable TANF activities, federal law permits a limited amount of the federal TANF basic block grant to be used for other programs. A maximum of 30% of the TANF block grant may be used for the following combined transfers or expenditures: (1) transfers to the Child Care and Development Block Grant; (2) transfers to the Social Services Block Grant (SSBG), with a maximum transfer to the SSBG set at 10% of the basic block grant; (3) as state match for “reverse commuter grants,” providing public transportation from inner cities to the suburbs.

What Expenditures May a State Count Toward its Maintenance of Effort (MOE) Requirement?

The range of expenditures on activities that states may count toward the maintenance of effort requirement is—like the authority to spend federal funds—quite broad. The expenditures need not be in the “TANF program” itself, but in any program that provides benefits and services to TANF-eligible families in cash assistance, child care assistance, education and job training, administrative costs, or any other activity designed to meet TANF’s statutory goals. States may count expenditures made by local governments toward the MOE requirement.

Additionally, there is a general rule of federal grants management that permits states to count as a state expenditure “third-party” in-kind donations from non-governmental entities. These third-party donations may be counted toward the TANF MOE as long as they meet the requirements of providing benefits or services to TANF-eligible families and meet the requirements of the types of activities that states may count toward the MOE requirement.

The MOE requirement sets a minimum amount that states must expend from their own funds. Under current law, there are incentives for states to expend funds beyond this minimum. States must spend more than the minimum MOE to access TANF contingency funds. Additionally, states can receive extra “credit” toward their work participation standards for spending more than the minimum required.

How Have States Used TANF Funds?

Figure 1 shows the uses of federal TANF grants to states and state MOE funds in FY2014. In FY2014, a total of \$31.9 billion of both federal TANF and state MOE expenditures were either expended or transferred to other block grant programs. Basic assistance, the category that most closely reflects cash assistance, represented 26% (\$8.4 billion) of total FY2014 TANF and MOE dollars.

TANF is a major contributor of child care funding. In FY2014, 16% of all TANF funds used were either expended on child care or transferred to the child care block grant (the Child Care and

Development Fund, or CCDF). TANF is also a major contributor to the child welfare system, which provides foster care, adoption assistance, and services to families with children who either have experienced or are at risk of experiencing child abuse or neglect. However, TANF’s accounting system does not clearly capture expenditures associated with spending on the child welfare system. Most TANF funding for these programs is subsumed in the catch-all “other” expenditure category. Some states also count as MOE dollars their expenditures on pre-Kindergarten programs. These expenditures too are subsumed in the “other” expenditure category.

Figure 1. Uses of TANF and MOE Funds, FY2014
(Dollars in billions)

Source: Congressional Research Service (CRS) based on data from the U.S. Department of Health and Human Services (HHS).

See **Table A-3** for dollar amounts of total federal TANF and state MOE funds associated with each of these categories. For state-specific information on the use of TANF funds, see **Table B-1** and **Table B-2**.

How Much of the TANF Grant Has Gone Unspent?

TANF law permits states to “reserve” unused funds without time limit. This permits flexibility in timing of the use of TANF funds, including the ability to “save” funds for unexpected occurrences that might increase costs (such as recessions or natural disasters).

At the end of FY2014 (September 30, 2014, the latest data currently available), a total of \$3.4 billion of federal TANF funding remained neither transferred nor spent. However, some of these unspent funds represent monies that states had already committed to spend later. At the end of FY2014, states had made such commitments to spend—that is, had obligated—a total of \$1.7 billion. Generally, obligations are binding commitments to spend, and they come in the form of contracts and grants to provide benefits and services. However, the definition of “obligation” varies from program to program, and because TANF essentially consists of 54 different programs (one for each state, the District of Columbia, and the territories), what constitutes an obligation may vary.

At the end of FY2014, states had \$1.6 billion of “unobligated balances.” These funds are available to states to make *new* spending commitments. **Table B-3** shows unspent TANF funds by state.

The Caseload

How Many Families Receive TANF- or MOE-Funded Benefits and Services?

This number is not known. Federal TANF reporting requirements focus on families receiving only ongoing *basic (i.e., cash) assistance*, with no complete reporting on families receiving other TANF benefits and services. As discussed in a previous section of this report, TANF basic assistance accounts for about 26% of all TANF expenditures. Therefore, the federal reporting requirements that pertain to families receiving “assistance” are likely to undercount the number of families receiving any TANF-funded benefit or service.

How Many Families and People Currently Receive TANF- or MOE-Funded Cash Assistance?

Table 3 provides cash assistance caseload information. A total of 1.6 million families, composed of 4.1 million recipients, received TANF- or MOE-funded cash in March 2015. The bulk of the “recipients” were children—2.9 million in that month. For state-by-state cash assistance caseloads, see **Table B-4**.

Table 3. TANF Cash Assistance Caseload: March 2015

Total Families	1,618,151
Total Recipients	4,067,509
Total Adults	1,120,809
Total Children	2,946,700

Source: Congressional Research Service (CRS) based on data from the U.S. Department of Health and Human Services (HHS).

Notes: TANF cash assistance caseload includes families receiving assistance in state-funded programs counted toward the TANF maintenance of effort (MOE) requirement.

How Does the Current Cash Assistance Caseload Level Compare with Historical Levels?

Figure 2 provides a long-term historical perspective on the number of families receiving cash assistance, from July 1959 to March 2015. Before 1997, these are families that received cash assistance from the Aid to Families with Dependent Children (AFDC) program. From 1997 onward, these are families that received cash assistance from TANF.

The shaded areas of the figure represent months when the national economy was in recession. Though the health of the national economy affected the trend in the cash assistance caseload, the long-term trend in receipt of cash assistance does not follow a classic counter-cyclical pattern. Such a pattern would have the caseload rise during economic slumps, and then fall again during

periods of economic growth. Factors other than the health of the economy (demographic trends, policy changes) also influenced the caseload trend.

The figure shows two periods of sustained caseload increases: the period from the mid-1960s to the mid-1970s and a second period from 1988 to 1994. The number of families receiving cash assistance peaked in March 1994 at 5.1 million families. The cash assistance caseload fell rapidly in the late 1990s (after the 1996 welfare reform law) before leveling off in 2001. In 2004, the caseload began another decline, albeit at a slower pace than in the late 1990s.

During the recent 2007-2009 recession and its aftermath, the caseload began to rise from 1.7 million families in August 2008, peaking in December 2010 at close to 2.0 million families. By March 2015, the cash assistance caseload had declined to a new post welfare reform low of 1.6 million families.

Figure 2. Number of Families Receiving Cash Assistance, July 1959-March 2015

Source: Congressional Research Service (CRS) with data from the U.S. Department of Health and Human Services (HHS).

Notes: Shaded areas denote months when the national economy was in recession. Information represents families receiving cash assistance from Aid to Dependent Children (ADC), Aid to Families with Dependent Children (AFDC), and TANF. For October 1999 through March 2015, includes families receiving assistance from Separate State Programs (SSPs) with expenditures countable toward the TANF maintenance of effort requirement. See **Table A-4** for average annual data on families, recipients, adult recipients, and child recipients of ADC,/AFDC and TANF cash assistance for 1961 to 2014.

Table B-5 shows recent trends in the number of cash assistance families by state.

What Are the Characteristics of Cash Assistance Families?

Historically, the “typical” cash assistance family has been headed by a single parent (usually the mother) with one or two children. The single parent has also typically been unemployed. However, the cash assistance caseload decline has occurred together with a major shift in the composition of the rolls. **Figure 3** shows the change in the size and composition of the cash assistance caseload under both AFDC (1988 and 1994) and under TANF. In FY1988, 84% of AFDC families were headed by an unemployed adult recipient. In FY2013, families with an unemployed adult recipient represented 45% of all cash assistance families. This decline occurred, in large part, as the number of families headed by unemployed adult recipients declined more rapidly than other components of the cash assistance caseload.

With the decline in families headed by unemployed adults, the share of the caseload that represented families with employed adults and “child only” families has increased. In FY2013, families with employed adult recipients represented 17% of all cash assistance families. “Child-only” families are those where no adult recipient receives benefits in their own right; the family receives benefits on behalf of its children. The share of the caseload that was child-only in FY2013 was 38%. In FY2013, families with a non-recipient, non-parent relative (grandparents, aunts, uncles) represented 13% of all cash assistance families. Families with ineligible, noncitizen adults or adults who have not reported their citizenship status made up 11% of the cash assistance caseload in that year. Families where the parent received Supplemental Security Income (SSI) and the children received TANF made up 9% of all cash assistance families in FY2013.

Figure 3. Characteristics of Cash Assistance Families, Selected Years FY1988 to FY2013

Source: Congressional Research Service (CRS) tabulations of the TANF national data files.

Notes: TANF cash assistance caseload includes families receiving assistance in state-funded programs counted toward the TANF maintenance of effort (MOE) requirement.

For more information on the characteristics and the changes in the composition of the cash assistance caseload, see CRS Report R43187, *Temporary Assistance for Needy Families (TANF): Size and Characteristics of the Cash Assistance Caseload*, by Gene Falk.

TANF Cash Benefits: How Much Does a Family Receive in TANF Cash Per Month?

There are *no* federal rules that help determine the amount of TANF cash benefits paid to a family. (There are also no federal rules that require states to use TANF to pay cash benefits, though all states do so.) Benefit amounts are determined solely by the states.

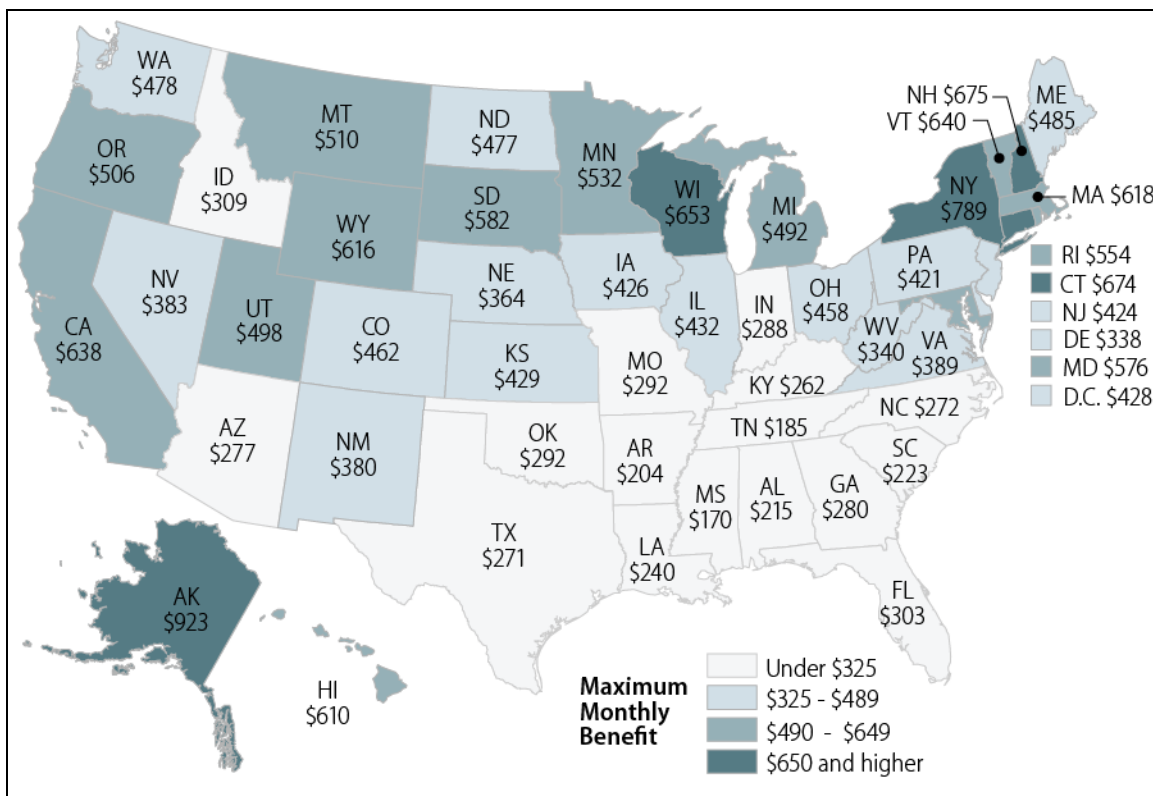

Most states base TANF cash benefit amounts on family size, paying larger cash benefits to larger families on the presumption that they have greater financial needs. The maximum monthly cash benefit is usually paid to a family that receives no other income (e.g., no earned or unearned income) and complies with program rules. Families with income other than TANF often are paid a reduced benefit. Moreover, some families are financially sanctioned for failure to meet a program requirement (e.g., a work requirement), and are also paid a lower benefit.

Figure 4 shows the maximum monthly TANF cash benefit by state for a single mother caring for two children (family of three) in July 2013.³ The benefit amounts shown are those for a single-parent family with two children. Some states vary their benefit amounts for other family types such as two-parent families or “child-only” cases. States also vary their benefits by other factors such as housing costs and sub-state geography. For a family of three, the maximum TANF benefit paid in July 2013 varied from \$170 per month in Mississippi to \$923 per month in Alaska. In all states, the maximum TANF cash assistance amount for this sized family was less than 50% of poverty-level income.⁴

³ States are not required to report to the federal government their cash assistance benefit amounts in either the TANF state plan (under Section 402 of the Social Security Act) or in annual program reports (under Section 411 of the Social Security Act). The benefit amounts shown are from the “Welfare Rules Database,” maintained by the Urban Institute and funded by the Department of Health and Human Services (HHS).

⁴ In 2013, the HHS poverty guidelines for the contiguous 48 states and the District of Columbia for a family of 3 was \$1,628 per month. Higher poverty lines applied in Alaska (\$2,034 per month for a family of 3) and Hawaii (\$1,873 per month for a family of 3).

Figure 4. TANF Cash Assistance Maximum Monthly Benefit Amounts for a Single Parent Family with Two Children, July 2013

Source: Congressional Research Service (CRS), based on data from the Urban Institute’s *Welfare Rules Database*.

For additional information on TANF benefit amounts by state, see CRS Report R43634, *Temporary Assistance for Needy Families (TANF): Eligibility and Benefit Amounts in State TANF Cash Assistance Programs*, by Gene Falk.

TANF Work Participation Standards

What Is the TANF Work Participation Standard States Must Meet?

The TANF statute requires states to have 50% of their caseload meet standards of participation in work or activities—that is, a family member must be in specified activities for a minimum number of hours.⁵ There is a separate participation standard that applies to the two-parent portion of a state’s caseload, requiring 90% of the state’s two-parent caseload to meet participation standards. States that fail the TANF work participation standards are at risk of being penalized by a reduction in their block grant amounts.

However, the statutory work participation standards are reduced by a “caseload reduction credit.” The caseload reduction credit reduces the participation standard one percentage point for each

⁵ Some families are excluded from the participation rate calculation.

percentage point decline in a state's caseload. Additionally, under a regulatory provision, a state may get "extra" credit for caseload reduction if it spends more than required under the TANF MOE. Therefore, the effective standards states face are often less than the 50% and 90% targets, and vary by state and by year.

States that fail to meet the TANF work participation standard are at *risk* of being penalized through a reduction in their block grant. However, penalties can be forgiven if a state claims, and the Secretary of HHS finds, that it had "reasonable cause" for failing the standard. Penalties can also be forgiven for states that enter into "corrective compliance plans," and subsequently meet the work standard.

Have There Been Changes in the Work Participation Rules Enacted Since the 1996 Welfare Reform Law?

The 50% and 90% target standards that states face, as well as the caseload reduction credit, date back to the 1996 welfare reform law. However, the Deficit Reduction Act of 2005 (P.L. 109-171) made several changes to the work participation rules effective in FY2007:

- The caseload reduction credit was changed to measure caseload reduction from FY2005, rather than the original law's FY1995.
- The work participation standards were broadened to include families receiving cash aid in "separate state programs." Separate state programs are programs run with state funds, distinct from a state's "TANF program," but with expenditures countable toward the TANF MOE.
- HHS was instructed to provide definition to the allowable TANF work activities listed in law. HHS was also required to define what is meant by a "work-eligible" individual, expanding the number of families that are included in the work participation calculation.
- States were required to develop plans and procedures to verify work activities.

The American Recovery and Reinvestment Act of 2009 (ARRA, P.L. 111-5), a law enacted in response to the sharp economic downturn of 2007-2009, held states "harmless" for caseload increases affecting the work participation standards for FY2009 through FY2011. It did so by allowing states to "freeze" caseload reduction credits at pre-recession levels through the FY2011 standards.

What Work Participation Rates Have the States Achieved?

HHS computes two work participation rates for each state that are then compared with the effective (after-credit) standard to determine if it has met the TANF work standard. An "all-families" work participation rate is computed and compared with the all-families effective standard (50% minus the state's caseload reduction credit). HHS also computes a two-parent work participation rate that is compared with the two-parent effective standard (90% minus the state's caseload reduction credit).

Figure 5 shows the national average all-families work participation rate for FY2002 through FY2012. For the period FY2002 through FY2011, states achieved an all-families work participation rate hovering around 30%. In FY2012, the all-families work participation rate ticked up to 34.4%. In that year, states faced higher work participation standards because the "freeze" to the caseload reduction credit enacted in ARRA expired.

Figure 5. National Average TANF Work Participation Rate for All Families, FY2002-FY2012

Source: Congressional Research Service (CRS), based on data from the U.S. Department of Health and Human Services (HHS).

How Many Jurisdictions Have Failed the All-Families Standard From FY2002 Through FY2012?

Table 4 shows which states failed the TANF all-families work participation standards from FY2002 through FY2012. Before FY2007, only a few jurisdictions failed to meet TANF all-families work participation standards. However, in FY2007, 15 jurisdictions failed to meet the all-families standard. FY2007 was the first year in which policies under the DRA were effective. This number declined to nine in FY2008 and eight in FY2009.

In FY2012, despite the uptick in the national average work participation rate, 16 states failed to meet the all-family standard, the largest number of states that did not meet their participation standards in any one year since the enactment of TANF. FY2012 was the year that ARRA’s “freeze” of the caseload reduction credit expired, and states were generally required to meet higher standards than in previous years. For state-by-state information on FY2012 caseload reduction credits, effective (after credit) standards, and work participation rates related to the “all families” standard, see **Table B-7**.

Have States Met the Two-Parent Work Participation Standard?

In addition to meeting a work standard for all families, TANF also imposes a second, 90% standard for the two-parent portion of its cash assistance caseload. This standard too can be reduced for caseload reduction.

Table 5 shows whether each state met its two-parent work participation standard for FY2002 through FY2012. However, the display on the table is more complex than that for reporting whether a state failed its “all family” rate. A substantial number of states have reported *no* two-parent families subject to the work participation standard.⁶ These states are denoted on the table

⁶ Before the changes made by the DRA were effective, a number of states had their two-parent families in separate state (continued...)

with an “NA,” indicating that the two-parent standard was not applicable to the state in that year. For states with two-parent families in its caseload, the table reports “Yes” for states that met the two-parent standard, and “No” for states that failed the two-parent standard.

In FY2012, 27 jurisdictions reported that no two-parent families were included in the TANF work participation standard calculation. Of the 27 jurisdictions that had two-parent families in their TANF work participation calculation, 7 met the standard and 20 did not. For state-by-state information on FY2012 caseload reduction credits, effective (after credit) standards, and work participation rates related to two-parent families, see **Table B-8**.

Table 5. Two-Parent TANF Work Participation Standard, Status by State: FY2002-FY2012

(“Yes” indicates a state met the standard; “No” indicates the state failed to meet the standard; and “NA” means the standard was not applicable to the state in that year [no two-parent families in its caseload].)

(...continued)

programs that were not included in the work participation calculation. When DRA brought families receiving assistance in separate state programs into the work participation rate calculations, a number of states moved these families into solely-state-funded programs. These are state-funded programs with expenditures *not* countable toward the TANF maintenance of effort requirement, and hence are outside of TANF’s rules.

Appendix A. Supplementary Tables

Table A-1. Temporary Extensions of TANF, FY2003-FY2006

Public Law	Time Period	Notes
P.L. 107-229	Oct. 1, 2002-Dec. 31, 2002	Extension as part of a continuing resolution.
P.L. 107-294	Jan. 1, 2003-Mar. 31, 2003	Extension as part of a continuing resolution.
P.L. 108-7	Apr. 1, 2003-June 30, 2003	Extension as part of the Consolidated Appropriations Act.
P.L. 108-40	July 1, 2003-Sept. 30, 2003	Free-standing bill that amended the Social Security Act to extend TANF and related programs.
P.L. 108-89	Oct. 1, 2003-Mar. 31, 2004	Multipurpose bill that extended programs through the first half of FY2004.
P.L. 108-210	Apr. 1, 2004-June 30, 2004	Freestanding bill that extended funding authority for the program through June 30, 2004.
P.L. 108-262	July 1, 2004-Sept. 30, 2004	Freestanding bill that extended funding authority for the program through Sept. 30, 2004.
P.L. 108-308	Oct. 1, 2004- Mar. 31, 2005	Freestanding bill that extended funding authority for the programs through Mar. 31, 2005.
P.L. 109-4	Apr. 1, 2005-June 30, 2005	Freestanding bill that extended funding authority for the programs through June 30, 2005.
P.L. 109-19	July 1, 2005-Sept. 30, 2005	Freestanding bill that extended funding authority for the programs through Sept. 30, 2005.
P.L. 109-68	Oct. 1, 2005-Dec. 31, 2005	Bill to provide extra funding to help states provide benefits to families affected by Hurricane Katrina, suspend certain requirements in states affected by the hurricane, and extend the funding authority for the programs through December 31, 2005.
P.L. 109-161	Jan. 1, 2006-Mar. 31, 2006	Freestanding bill that extended funding authority for the programs through March 31, 2006. It reduced the bonus for reducing out-of-wedlock births for FY2006-FY2010 to offset the costs of the temporary extension.

Source: Congressional Research Service (CRS).

Note: Table shows extensions through 2006, when the Deficit Reduction Act of 2005 (P.L. 109-171) extended TANF through FY2010. Temporary extensions after 2010 are shown in **Table A-2**.

Table A-2. Temporary Extensions of TANF, FY2011-FY2015

Public Law	Time Period	Notes
P.L. 111-242	Oct. 1, 2010-Dec. 3, 2010	Extension as part of a continuing resolution.
P.L. 111-290	Dec. 4, 2010-Dec. 7, 2010	Extension as part of a continuing resolution.
P.L. 111-291	Dec. 8, 2010-Sept. 30, 2011 (except supplemental grants, Dec. 8, 2010-June 30, 2011)	Extension as part of the Claims Resolution Act of 2010. It funded supplemental grants only through the first three quarters of FY2011 and at a reduced rate.
P.L. 112-35	Oct. 1, 2011-Dec. 31, 2011	Free-standing bill to extend TANF for three months. No funding for TANF supplemental grants.

Public Law	Time Period	Notes
P.L. 112-78	Jan 1, 2012-Feb. 21, 2012	Extension of TANF for two months, as part of a bill to provide a two-month extension for the 2011 payroll tax reduction, extended unemployment compensation, and other expiring provisions.
P.L. 112-96	Feb. 22, 2012-Sept. 30, 2012	Extension of TANF for the remainder of FY2012 included as part of a bill to extend the 2011 payroll tax reduction, unemployment compensation, and other expiring provisions.
P.L. 112-175	Oct. 1, 2011-March 27, 2013	Extension of TANF for the first six months of FY2013 as part of a continuing resolution.
P.L. 113-6	March 28, 2013-Sept. 30, 2013	Extension of TANF for the remainder of FY2013 as part of a continuing resolution.
P.L. 113-46	Oct. 17, 2013-Jan 15, 2014	Extension of TANF as a part of a continuing resolution. The resolution ended the “government shutdown,” and a TANF funding gap between Oct 1 and Oct 16, 2013
P.L. 113-73	Jan. 16, 2014-Jan. 18, 2014	Extension of TANF funding as part of a short-term continuing resolution.
P.L. 113-76	Jan 19, 2014-Sept. 30, 2014	Extension of TANF funding for the remainder of FY2014 as part of an omnibus appropriation act.
P.L. 113-164	Oct. 1, 2014-Dec 11, 2014	Extension of TANF funding through Dec. 11, 2014, as part of a continuing resolution.
P.L. 113-202	Dec. 12, 2014-Dec 13, 2014	Extension of TANF funding through Dec. 13, 2014, as part of a short-term continuing resolution.
P.L. 113-203	Dec 14, 2014-Dec 17, 2014	Extension of TANF funding through Dec. 17, 2014, as part of a short-term continuing resolution.
P.L. 113-235	Dec. 18, 2014-Sept. 30, 2015	Extension of TANF funding for the remainder of FY2015 as part of an omnibus appropriations act.
P.L. 114-53	Oct. 1, 2015 – Dec. 11, 2015	Extension of TANF funding through December 11, 2015, as part of a short-term continuing resolution.

Source: Congressional Research Service (CRS), based on data from the U.S. Department of Health and Human Services (HHS) and the U.S. Census Bureau.

Notes: NA denotes not available. During transition reporting from AFDC to TANF, caseload statistics on adult and child recipients were not collected. For those years, TANF children as a percent of all children and percent of all poor children were estimated by HHS and published in *Welfare Indicators and Risk Factors, Annual Report to Congress*, Table TANF 2, p. A-7. See http://aspe.hhs.gov/hsp/14/indicators/rpt_indicators.pdf.

Table A-5. Families Receiving AFDC/TANF Cash Assistance by Family Category, Selected Years, FY1988 to FY2013

	1988	1994	2001	2006	2013
Monthly Average Number of Families					
Total Families	3,747,952	5,046,263	2,202,356	1,957,402	1,749,424
Family with Adult(s)/Not Employed	3,136,566	3,798,997	992,445	825,490	781,473

Child-Only/Caretaker Relative	5.0	6.5	11.6	13.4	13.4
Child-Only/Other	1.9	3.7	10.7	14.3	4.5

Source: Congressional Research Service (CRS) tabulations of the FY1988 and FY1994 AFDC Quality Control (QC) data files and the FY2001, FY2006, and FY2013 TANF National Data Files.

Notes: FY2001 through FY2013 data include families receiving assistance from separate state programs (SSPs) with expenditures countable toward the TANF maintenance of effort (MOE) requirement. For FY2013, TANF families with an adult recipient include those families with “work-eligible” non-recipient parents. These include non-recipient parents who have been time-limited or sanctioned off the rolls, but the family continues to receive a reduced benefit. For FY2001 and FY2006, such families cannot be identified and are classified as “child-only” families.

Appendix B. State Tables

Table B-I. Use of FY2014 TANF and MOE Funds by Category
(Dollars in millions)

State	Basic Assistance	Administration	Work	Child Care	Other Work Supports	Other Expenditures	Total
